DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 13-15, 18, 21-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Armstrong (2,036,184).

Regarding claim 18, the Armstrong reference discloses a surround comprising a base portion (a floor portion of a room); a first wall portion (the left wall of the room); a second wall portion (the right wall of the room); and a corner portion (formed by the meeting portions of the walls including member 1) engaged with the base portion, the first wall portion and the second wall portion, the corner portion comprising a multiple of horizontal shelf slots (spaces between members 8,9,10) arranged vertically along a length of the corner portion, wherein the horizontal shelf slots comprise blind openings of uniform height that extends into the corner portion to support a corresponding shelves 18 and 19.

The introductory statement of the intended use have been carefully considered but deemed not to impose any structural limitations on the claim(s) distinguishable over the device of Armstrong which is capable of being used in a bathroom or shower surround.

Regarding to claim 21, at least one of the horizontal shelf slots is defined by a top wall portion 8, a bottom wall portion 9, rear wall portion 1, and an open front end.

Regarding claim 22, one of the horizontal shelf slots includes a uniform nominal depth extending into the corner portion.

Regarding claim 23, each of the horizontal shelf slots is adapted to support one of the corresponding multiple of shelves.

Regarding claim 24, the corner portion, the top wall portion 8, the bottom wall portion 9, the arcuate rear wall portion 1 comprise a single continuous piece.

Response to Arguments

3. Applicant's arguments on 11/30/2009 with respect to claim 18 have been considered but are not persuasive.
4. Applicant argues that Armstrong does not disclose horizontal shelf slots extending into the corner portion. The openings of Armstrong appear to extend entirely through the corner portion. Examiner disagrees with applicant. Figs. 1 and 3 of Armstrong show "blind openings" that are formed between spaced ends of strips 8, 9 and 10. These openings extend into the corner portion, wherein the corner portion includes members 1, 8, 9 and 10. The openings in this case do not extend entirely through the back member 1 as shown in Fig. 3.
